BASIS OF THE OPPOSITION.

The Advertiser in proclaiming coun ty and municipal government as an un necessary and expensive luxury holds first that "every separate district would splurge in the matter of ltuprovements unless the taxpayers could carry a majority of the votes against a prodigal outlay"; second, that it would result in bonded indebtedness; third, that the advantage of bonded indebtedness is with "taxeaters"; fourth, that the tendency of business operations is toward centralization.

There is a degree of truth in these assertions, but it is a half-truth which is evasive and misleading. Foolish, the country warrant its renewal, profligate expenditure of public funds fairs. PRECOCIOUS INVENTORS

John Ericsson, the famous Swede built the Monitor and the great iron bridge at Sunderland, England, was reupon the greed or jealousies of others markably bright as a child, inventing at the age of 12 a new form of sawmiil and preparing a working model of it The saw blade he made of an old watch spring, moved by a crank constructed of a broken teaspoon, and his only tools were a knife, a file and a gimlet.
